

**AMENDMENT TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application:

**LISTING OF CLAIMS**

Claim 1 (currently amended): A foldable chair assembly, comprising:  
a support frame;  
a first support leg having an upper portion pivotally mounted on a bottom of the support frame;  
a second support leg having an upper portion pivotally mounted on the bottom of the support frame; and  
two opposite resting members each pivotally mounted between a mediate portion of the first support leg and a mediate portion of the second support leg;  
wherein, each of the two resting members has a first end pivotally mounted on an inner side of the first support leg by a first pin and a second end pivotally mounted on an outer side of the second support leg by a second pin;  
wherein, the mediate portion of the first support leg is provided with a limit rod operationally rested on the mediate portion of the second support leg so that the first support leg is supported by the second support leg when the foldable chair assembly is disposed at an extended state.

Claim 2. (original) The foldable chair assembly in accordance with claim 1, wherein each of the two resting members is substantially V-shaped.

Claims 3 and 4 (canceled).

Claim 5. (currently amended) The foldable chair assembly in accordance with claim [[4]] 1, wherein the limit rod is located above the first pin at the first end of each of the two resting members.

Claim 6. (currently amended) The foldable chair assembly in accordance with claim [[4]] 1, wherein the limit rod is substantially  $\Omega$ -shaped.

Claim 7. (currently amended) The foldable chair assembly in accordance with claim [[4]] 1, wherein the limit rod is located at an intersection of the first support leg and the second support leg.

Claim 8. (canceled).

Claim 9. (currently amended) [[The]] A foldable chair assembly ~~in accordance with claim 8, comprising:~~

a support frame;

a first support leg having an upper portion pivotally mounted on a bottom of the support frame;

a second support leg having an upper portion pivotally mounted on the bottom of the support frame; and

two opposite resting members each pivotally mounted between a mediate portion of the first support leg and a mediate portion of the second support leg;

wherein each of the two resting members is formed with a bent portion;

the bent portion of each of the two resting members has an inner arc opening facing downward when the foldable chair assembly is disposed at ~~an~~ the extended state.

Claim 10. (currently amended) [[The]] A foldable chair assembly ~~in accordance with claim 1, comprising:~~

a support frame;

a first support leg having an upper portion pivotally mounted on a bottom of the support frame;

a second support leg having an upper portion pivotally mounted on the bottom of the support frame; and

two opposite resting members each pivotally mounted between a mediate portion of the first support leg and a mediate portion of the second support leg;

wherein each of the two resting members is formed with a bent portion;

the bent portion of each of the two resting members has an inner arc opening facing upward when the foldable chair assembly is disposed at a folded state.

Claim 11. (original) The foldable chair assembly in accordance with claim 1, wherein the bottom of the support frame is provided with a plurality of pivot ears for pivoting the upper portion of each of the first support leg and the second support leg by a plurality of pivot pins.

Claim 12. (currently amended) The foldable chair assembly in accordance with claim 1, wherein the second support leg has a length greater than that of the first support leg, so that the support frame with a ~~and the~~ seat are disposed at an inclined state.
